WATER RETENTION | SOIL REGENERATION | REFORESTATION

BEFORE

theflowpartnership

April 2019, The Saseri Water Bank

A snapshot before the transformation, demonstrating what we aim to achieve in Baran.

What if we
could
change
this?

Location

Saseri, Karauli, Rajasthan, India

- a region facing severe water stress

Landscape

Barren, dry land with acute water scarcity

Challenges

- Semi-arid climate with temperatures up to 50°C
- Limited resources leading to migration and marginal living
- Farmers unable to farm due to lack of water

FOUNDATION

Swipe

in 6 months!

Impact

- Barren land transformed into fertile farmland
- 10,000 m³ water capacity created, enabling wheat cultivation
- Revitalised ecosystem supporting local wildlife
- Children able to go to school once again

Community Action

- Local villagers built a water bank and managed the whole project of construction
- Thousands of tractor loads of earth moved in weeks, with time & tractors provided by the villagers

October 2019, The Saseri Water Bank

Witness the remarkable change achieved in Karauli – a precedent inspiring our project in Baran
